About Me

I'm Kanav Mahajan, a freelance full stack developer who builds scalable , secure and user-focused web apps using modern technologies-frontend to backend, whatever the stack demands.

**EXPERIENCE MATTERS - CHOOSE
THE EXPERTS**

Java SpringBoot

Delivered robust and scalable APIs using **Spring Boot**, with secure authentication, optimized database performance, and production-ready architecture for enterprise-grade applications.

MERN Stack Development

Built and deployed dynamic full stack applications using the **MERN stack**, ensuring fast, responsive UIs with a secure, high-performance backend and seamless REST integration.

Technology We Work

Python Django

Developed clean, maintainable web apps with **Django**, leveraging its powerful admin interface, ORM, and rapid development features to deliver secure, scalable solutions on time.

Android / iOS Application

Delivered smooth, responsive mobile experiences for **Android and iOS**, using native and cross-platform tools—focused on intuitive UI, performance, and real-world usability.

Mission

To craft scalable, secure, and user-friendly digital experiences by combining full stack development with thoughtful design—helping clients launch faster, perform better, and grow with confidence.

Vision

To be the go-to technology partner for businesses and entrepreneur Delivering solutions that are not only technically sound but also Strategically aligned with long-term success.

Singh Travels

We believe in empowering innovation and driving change through technology.
